Senior Telecom Development Engineer

Do you share our passion for Voice-over-IP and do you want to participate to our success? We are looking for a new senior telecom developer position in Zurich reporting directly to our CTO and playing a key role in programming multiple JAVA based applications.

YOUR MISSION

- Designing, coding and debugging telecom services in the areas of SIP signalization, routing, real time billing and provisioning
- Developing telecom products and features based on JAVA JAIN SLEE
- Active interacting with our administration and user interface developers
- Performing troubleshooting in debugging in our network
- Providing technical support to our customer service
- Screening new technological developments in the SIP and PBX fields.

YOUR PROFILE

- ✓ 5 years SIP and JAVA JAIN SLEE development experience
- ✓ Knowledge of SQL and MGCP
- ✓ SS7 technologies knowledge as advantage
- ✓ Experience in real time development
- ✓ Systematic, methodic, pro-active and high motivated
- ✓ Fluent in English. German or French as advantage.

The **peoplefone group** is a European leader of the IP telephony for business and residential customers. The group was founded in 2005 and is today present in Switzerland, Germany, Austria, Poland, Slovakia and Lithuania. Our competitive advantage is our indirect sales approach with installation partners combined with our strong entrepreneur and family spirit!

Do we have awake your interest? We enjoy in advance your CV and motivation letter sent to jobs@peoplefone.com.
