

Java Developer

Do you share our passion for disruptive technology in the telecommunication industry and want to contribute to the success in 7 European countries? We are looking for a passionate and engaged Java Developer based in our office in PUIDOUX and dedicated to the further development of our IT infrastructure, 100% created in-house.

Your tasks

- Development of new features for our cloud PBX solution
- Participate in the design and development of our REST API to integrate third party solution (like CRM, ...)
- Work together with our web development team to integrate services in our customer/partner interface
- Participate to the deployment and maintenance of our services
- Technical support to our customers and partners.

Your Skills

- Good knowledge of Spring with a minimum of 5 years' Java experience
- Wildfy experience as a plus
- Knowledge of NGINX including configuration
- Experience with tools like git, Docker, Linux
- Experience with Kubernetes or Gitlab CI is a plus.

Your Profile

- Independent, proactive, and interested to work in a dynamic organization where you make a difference
- A team-oriented, creative and open personality who is solution-oriented.
- Interested to develop new applications/services and open to learn new technologies
- Fluent in French and English and already established in Switzerland.

The **peoplefone group** is a European leader of the IP telephony for business and residential customers. The group was founded in 2005 and is today present in Switzerland, Germany, Austria, France, Poland, Slovakia and Lithuania. Our competitive advantage is the development of innovative products combined with our strong entrepreneur and family spirit!
